PROFESSIONAL SUMMARY

AI Engineering student with strong foundations in Python and full-stack web development. Experienced in building scalable web applications using Flask, SQLAlchemy, and Jinja2 with secure authentication and database integration. Skilled in designing backend logic, database schemas, and dynamic user interfaces. Seeking an entry-level Python Developer role to apply and strengthen backend development skills in a professional environment.

TECHNICAL SKILLS

Languages: Python, JavaScript, C, Java

Frameworks: Flask, Vue

Web Technologies: HTML5, CSS3, Bootstrap

Database: SQLite, Supabase

Tools: Git, GitHub, VS Code, Docker

ORM: SQLAlchemy

Concepts: RESTful Routing, Authentication & Authorization, Database Design, OOP, Data Structures & Algorithms

---

PROJECTS

Vehicle Parking Management System (Flask, SQLite)

- Built a multi-user parking web application with role-based access (Admin/User).
- Designed database schema using SQLAlchemy ORM.
- Implemented authentication, booking and release logic with dynamic Jinja2 templates.
- Structured backend using modular and scalable design principles.

Placement Portal System (Full Stack Web Application)

- Developed a placement management system with student and admin modules.
- Implemented secure user authentication and profile management.
- Designed database models for job postings and applications.
- Built dynamic routes, form validation, and data-driven templates.

EXPERIENCE

Deloitte Data Analytics Virtual Job Simulation – Forage

- Completed practical tasks involving data analysis and business problem-solving.
- Worked on data interpretation, insights generation, and reporting.
- Gained exposure to real-world analytics workflows and structured problem solving.

EDUCATION

B.Tech in Artificial Intelligence Engineering – Vignan's Institute of Information Technology

CGPA: 9.1

Bs in Data Science and Applications– IIT Madras Online Degree Program

Relevant Coursework: Python, DBMS, DSA, Mobile Application Development, Machine learning.
