PROFESSIONAL SUMMARY

AI Engineering student with hands-on experience in machine learning, deep learning, and NLP systems, complemented by strong content creation and communication skills. Skilled in translating complex AI solutions into structured, business-aligned insights. Passionate about bridging the gap between technical model development and measurable enterprise impact through strategic thinking and storytelling.

TECHNICAL & ANALYTICAL SKILLS

AI & ML: Supervised Learning, NLP, CNNs, RNNs, Sequence Modeling, Ensemble Methods
Tools & Frameworks: Python, PyTorch, Scikit-learn, Flask, SQLAlchemy
Data Handling: Feature Engineering, Model Evaluation, Validation Strategies
Business & Communication: Technical Writing, Presentation Development, Problem Framing, Structured Analysis
Creative Tools: Canva (Presentations & Visual Content), Content Editing

---

AI PROJECT EXPERIENCE

Multi-Class Sentiment Analysis (NLP)

- Built end-to-end ML pipeline using TF-IDF and ensemble modeling for 3-class sentiment prediction.
- Translated technical outputs into potential business applications such as automated feedback analysis.

Facial Attribute Prediction (Deep Learning)

- Developed CNN models (scratch + transfer learning) for age regression and gender classification.
- Evaluated performance and identified improvements through multi-task optimization.

Protein Secondary Structure Prediction

- Built Bidirectional RNN/GRU sequence models for structured biological prediction.
- Ensured precise input-output alignment and conducted structured error analysis.

CONSULTING & COMMUNICATION EXPERIENCE

- Created structured project documentation and presentations translating technical workflows into business-focused narratives.
- Experience in content creation and editing, simplifying AI/ML concepts for broader audiences.
- Strong ability to frame problems clearly, articulate value propositions, and communicate insights persuasively.
- Developed presentation materials and visual content using Canva.

EXPERIENCE

Deloitte Data Analytics Virtual Job Simulation – Forage

- Conducted structured data analysis tasks aligned with business problem-solving.
- Interpreted data insights and developed client-facing summary outputs.
- Strengthened analytical thinking and commercial awareness.

EDUCATION

B.Tech in Artificial Intelligence Engineering – Vignan's Institute of Information Technology
CGPA: 9.1
Diploma Level – IIT Madras Online Degree Program
Relevant Coursework: Data Science, DBMS, DLGenAI, Machine Learning, Application Development
